Security Program Manager (m/f/d)

Join sunhill technologies GmbH and **influence the future of mobility and payment** by fulfilling exciting and challenging projects. We are looking for motivated individuals to work on cutting-edge technologies with sunhill's big variety of partners. As a **subsidiary of Volkswagen Financial Services AG**, we keep the agile start-up spirit alive while leveraging the global reach of a worldwide successful automotive player.

You are looking for team spirit, creativity and an openness to new ideas? You have a passion for new technologies? What are you waiting for? Join our **international team** to manage, develop and scale mobile payment systems for a global market.

Your responsibilities

- Managing the company's ISMS (principles, policies, processes, procedures, guidelines and other information), educate the target audiences and audit the execution on the ISMS goals
- Assist in information security and risks assessments, perform threat analysis, vulnerability assessments, and provide guidance on product security enhancements
- Centralize incident response in a SOC Team and assist in creating processes to investigate on reported incidents and assist with implementing the various actions or changes to be made
- Manage the execution and monitor follow-up activities of penetration tests
- Contact point for operational data protection for departments and project teams
- Organisation of education and training for operational data protection
- Assisting on impact assessment on data protection (DPIA)
- Coordination of the alignment of processing directory, data subject information and agreements
- Coordination of the concepts for data subject rights across different countries, products and partners
- Preparation of guidelines and company agreement

You should be able to offer

- Several years of experience in the area of IT security and corresponding core topics (IT governance, threat modelling, threat assessment, security testing, security reviews, incident response)
- One year experience with operational data protection (EU-GDPR and related legislation)

- Experience in designing policy documentation and leading the implementation efforts by assisting with requirements engineering on a technical level for policy implementation
- Project management and documentation tools (preferably Atlassian Jira & Confluence)
- You have a university degree, preferably in (economic) computer science, engineering or related area of study
- Technical knowledge of and experience with software development
- Training in relation with data protection
- Certifications: ISO 27001, CISSP, CISM, CISA, COBIT, ITIL, project management (e.g. PMP, CSM)

What we can offer you

- A young and international company culture in a start-up work environment
- Strong team spirit and regular team building events
- Strong company vision to build the global leader in digital parking
- "Flex-time" employment
- Competitive salary and additional performance-based rewards
- Support for further education, training and professional development
